Agenda

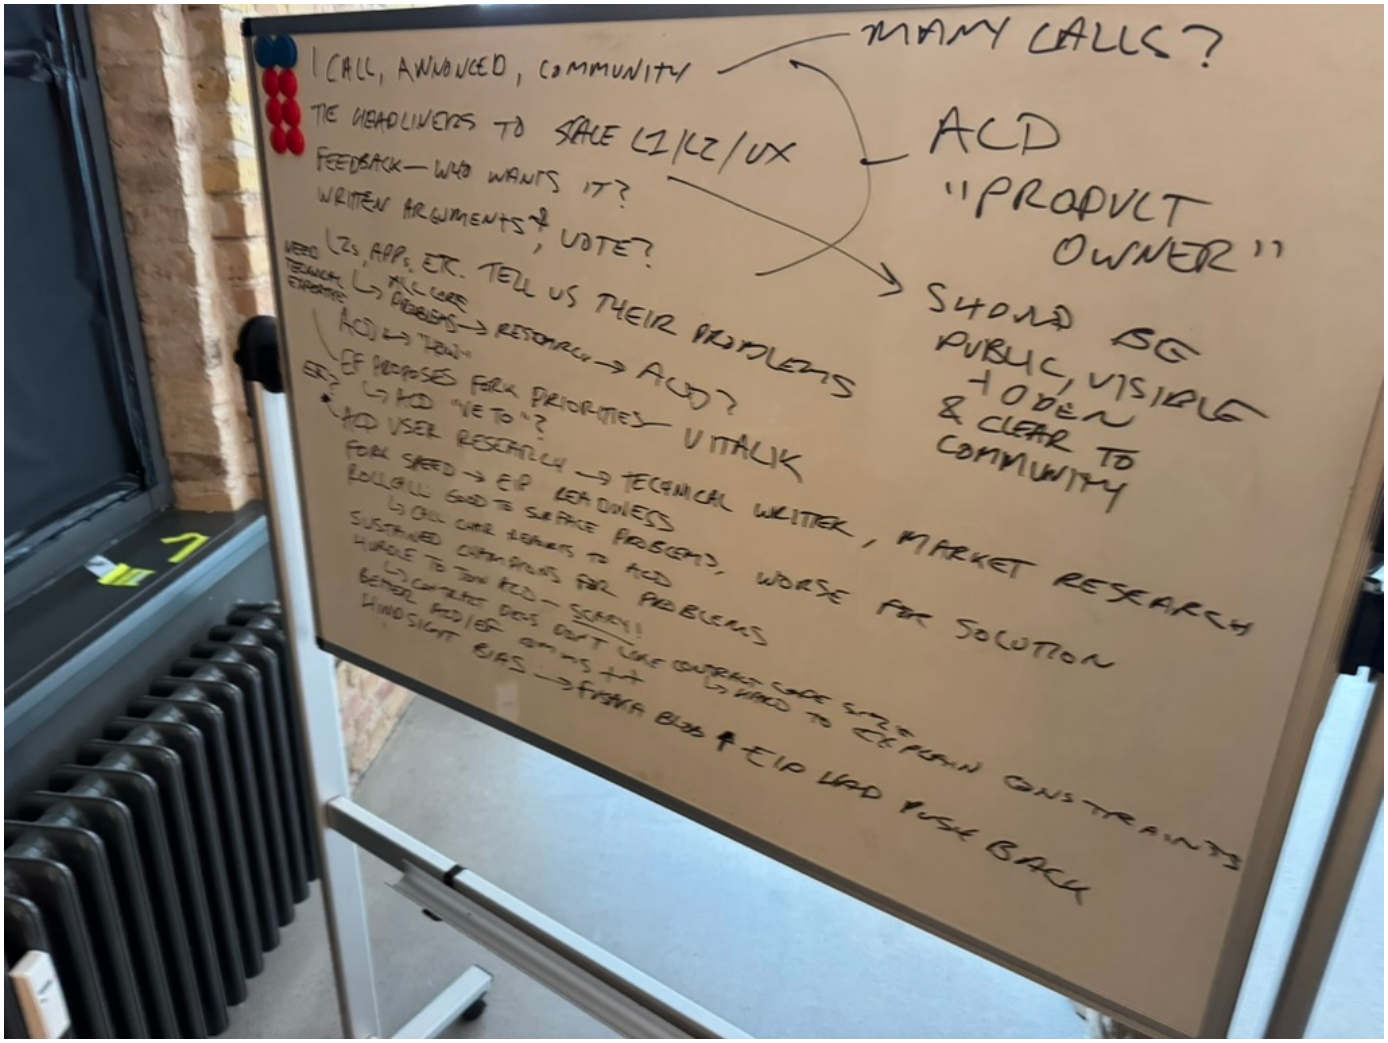
ACD Decision Quality

- What goes into hard forks is the #1 most important decision ACD makes. How do we improve the quality of our decision making?
- Tim's proposal: separate headliner (https://ethereum-magicians.org/t/community-consensus-fork-headliners-acd-working-groups/24088) & other EIPs decision.
  - Rationale: our most impactful upgrades were heavily driven by headliners.
- So far, not sure it's made a difference (https://ethereum-magicians.org/tag/glamsterdam)?
  - Available Attestations
  - EOF
  - Pureth
  - BAL
  - FOCIL
  - EPBS
- What should we use as signals that something is both important an urgent?
  - Core Devs?
  - "The community"? **Who?**
  - Protocol Research Call?
- Are there groups that *should* be proposing headliners but aren't? How do we solicit their input?
  - L2s?
  - ZKEVMs?
  - Application Layer Devs?
  - Infrastructure providers?

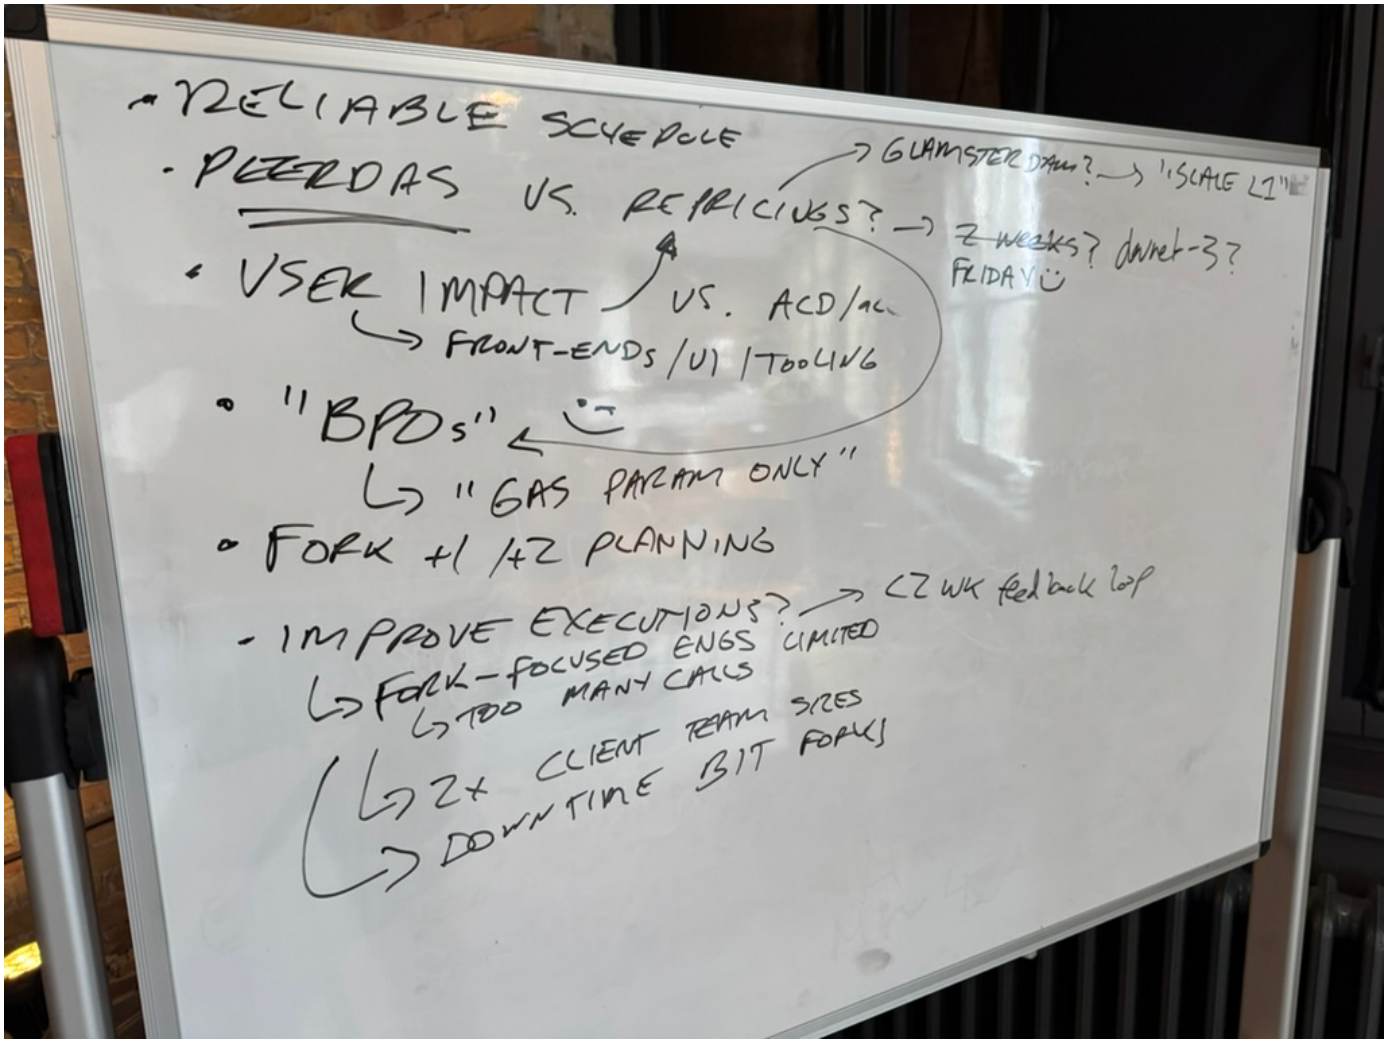
Coordination & Timelines

- How strongly should we commit to fork timelines?
  - What's the right cadence? 6 months? 9 months?
  - Scope vs. Time vs. Quality trilema
  - What happens if headliner delays?
  - What about other EIPs?
    - Fusaka Gas Limit EIPs
    - EIP-7939 🙃
- Time/fork-based commitments for non-consensus changes
  - Gas Limit
  - History Expiry
  - CL Hardening?
  - Partial State Node?

Notes



MANY CALLS?
1 CALL, ANNOUNCED, COMMUNITY
TIE HEADLINERS TO SCALE L1/L2/UX
FEEDBACK — WHO WANTS IT?
WRITTEN ARGUMENTS & VOTE?
ACD
"PRODUCT OWNER"
SHOULD BE PUBLIC, VISIBLE + OPEN & CLEAR TO COMMUNITY
L2s, APPS, ETC. TELL US THEIR PROBLEMS
RESEARCH → ACD?
VITALIK
TECHNICAL WRITER, MARKET RESEARCH
WORSE FOR SOLUTION
TECHNICAL EXPERTISE
ACD → "NEW"
EF PROPOSES FOUR PRIORITIES
ACD "VETO"?
ACD USER RESEARCH → TECHNICAL WRITER
FOUR SPEED → EIP LEADINESS
ROLLUP: GOOD TO SURFACE PROBLEMS
→ CHAIN CHANGES FOR PROBLEMS
SUSTAINED COMPLAINTS FOR ACD
HARDER TO TRUST ACD — SCARY!
→ COMMITTEE DOES DON'T LIKE CONTRACT SIZE CONSTRAINTS
→ HARD TO EXPLAIN
BETTER PROCESS
HINDSIGHT BIAS → FISHER BIAS
EIP HAD PUSH BACK



RELIABLE SCHEDULE
PEERDAS
VS. REPRICINGS?
→ GLAMSTER DRAM? → "SCALE L1"
USER IMPACT
VS. ACD/ac
→ FRONT-ENDS / UI / TOOLING
Z weeks? dannet-3?
FRIDAY
"BPOs"
→ "GAS PARAM ONLY"
FORK +/ /Z PLANNING
IMPROVE EXECUTIONS?
→ CZ WK feedback loop
→ FORK-FOCUSED ENGS LIMITED
→ TOO MANY CALLS
→ Z+ CLIENT TEAM SIZES
→ DOWNTIME BIT FORKS
